DETAILED ACTION

Information Disclosure Statement

The information disclosure statement (IDS) submitted on June 4th, 2008, is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

Allowable Subject Matter

Claims 1-4 and 8-20 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art of record teaches most aspects of the claimed invention, including separating a display panel into a front and rear glass, removing a surface layer from the glass, and making the glass into cullet (JP2002050294). However, the prior art of record neither teaches nor reasonably suggests such a glass recovery method for recycling glass of a display panel where the glass composition is analyzed prior to removing the surface layer and making the glass into cullet, as required by the combination as claimed in claim 20.

Claims 1-4 and 8-19 are allowed by virtue of their dependency.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

Bohland (US 6,129,779) teaches the practice of recovering metallic materials and glass from display panels that are pulverized into cullet prior to sorting.

Willis (US 5,663,997) teaches the practice of analyzing and sorting glass cullet as a function of composition, stressing that proper sorting improves the usability of the glass cullet for recycling into new products. Jamieson (US 3,980,180) teaches the practice of analyzing and sorting glass cullet by color.

Lehman (US 6,230,521 B1) and Mosch (US 5,718,737) teach that glass from municipal refuse is collected and sorted by color prior to being made into cullet. Rhys (US 3,802,558) teaches sorting glass from other refuse and then sorting glass by color and making it into cullet.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to THOMAS R. ARTMAN whose telephone number is (571)272-2485. The examiner can normally be reached on 9am - 5:30pm Monday - Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ed Glick can be reached on (571) 272-2490. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
